

Sweet Potato Chews

Dog Friendly

Ingredients

- 2 large sweet potatoes
- 2 Tbsp. olive oil
- Cinnamon (to sprinkle, optional)

Directions

1. Preheat the oven to 250 degrees F.
2. Slice sweet potatoes lengthwise about ¼" thick. Cut strips in half for smaller treats.
3. Line a cookie sheet with aluminum foil or parchment paper.
4. Place sweet potatoes on a cookie sheet (I prefer a cookie sheet over a bowl) to toss in olive oil. Each strip should be coated thoroughly in but not standing in olive oil.
5. Sprinkle with cinnamon (If desired, they are yummy with or without it!)
6. Bake for 2.5 – 3 hours. (The long cook time is what makes these chews tougher and longer lasting the way our dogs like it.)
7. Let cool. Then serve!
8. Store in airtight storage container in the refrigerator for 2 weeks or freeze for up to 4 months.
